Forecast For The United Kingdom
Issued by Met Office Exeter
at 1400 on Friday 17 Sep 2021

UK Outlook for Wednesday 22 Sep 2021 to Friday 1 Oct 2021:
A band of cloud and rain, heavy at times, looks likely to cross the UK on Wednesday, with sunny spells and showers either side of this. Thursday and Friday look to be unsettled and much of the country will see showers or longer spells of rain. Coastal gales likely in the northwest. From the weekend onwards, a northwest to southeast split to our weather is likely to develop. The northwest is expected to see the most unsettled conditions: outbreaks of rain, which could be heavy at times, and strong winds, possibly coastal gales. Drier and sunnier weather looks more likely across the southeast, though unsettled weather in the northwest could still spread here at times. Temperatures generally near or slightly above average, with some chilly and misty nights possible.
